

5.8 Has the Camp established an appropriate inventory of pharmacological products, medical supplies and equipment that is inventoried on a regular basis?

Appropriate inventory of pharmacological products, medical supplies and equipment that is inventoried on a regular basis.

Camp Sunshine's Medical Director has established a list of supplies, equipment and products that we have on hand for all sessions. Inventory is taken before each weekly session to ensure we have the appropriate amounts on hand. We also ask any physician on site to let us know if we are running low on something and need to order. Since we are a family camp we do also ask families to bring any medications/supplies that they will need while on site.

A physician is present at Camp to provide evaluation of acute problems. No treatment is offered at Camp other than management of routine childhood illnesses and minor injuries. Transportation will be provided to a nearby medical facility in the event that other treatment is necessary.
